

2019 ADVANCED STEM CAMP

Camp for CF students with CAD experience to explore advanced topics in CNC, CAM, & Laser Engraving

Do you like to solve problems?

Is creating and designing new ideas, products and inventions interesting to you?

Do you want to explore new careers and take part in FUN activities?

The Advanced STEM camp hosts students from 8:30-3:00 each day.

Students enjoy learning while taking part in activities that include:

- ♦ Designing projects, learning HSM Pro CAM software, prototyping using CNC machines, laser engraving, and more!
- ♦ Discussing future careers with community leaders
- ♦ Working with fellow students to develop leadership skills
