

Dear Administrators of CFHS,

I am emailing to request early graduation in May of 2019. At the end of the current semester, I will have completed all required course material for graduation and have attained the 45 credits needed to graduate. I decided to request early graduation because thus far, school has not benefited my mental health, and I feel I would learn more if allowed to pursue my own interests.

To me, it is important to have some semblance of control over my own life and time, and being here makes me feel not just powerless, but passive in the progression of my own education. I like to learn. In the past few years, I have taught myself a variety of subjects, including but not limited to: computer programming, Italian, fiction writing, basic accounting, politics, neuroscience, and human biology.

Were I permitted to graduate early, my education would not cease to progress; rather, it would accelerate. I hope that you will consider granting this request, and I thank you for your time.

Sincerely and respectfully,

Sierra Miller
