

The Board recognizes that some students may need prescription and non-prescription medication to participate in their educational program. It is the responsibility of the parent or legal guardian to ensure that the school receives properly authorized medication. Medication shall be administered and accessed only by the school nurse, health assistant, or, in the absence of health office staff, by a person who has successfully completed the Iowa School Medication Management course. A medication administration course and periodic update shall be overseen by a registered nurse, and a record of course completion shall be kept on file by the district.

Medication shall not be administered without authorization from the parent or legal guardian. Authorization shall include the student's name, date of request, medication name, administration instructions, and authorizing signature. The medication must be in the original labeled container either as dispensed by the pharmacist or as sold by the manufacturer. Dosing directions must be within the Manufacturer's Direction for Use on the product label. All medications provided by the parent shall be in an unopened container within the expiration date for use.

- The District will provide Acetaminophen 325mg-650mg for oral dosing every four to six hours as needed during instructional hours to secondary students (grades 7-12) with authorization from the parent or legal guardian.
- The District will not provide Acetaminophen for elementary students (grades PK-6).

A record of the administration of medication shall be kept for each student receiving medication and shall include:

- Date
- Student's name
- Medication
- Medication dosage
- Administration time
- Administration method
- Signature and title of person administering medication
- Any unusual circumstances, actions or omissions

By law, the school district shall permit students with asthma or other airway constricting disease or students with risk of anaphylaxis to self-administer their medication or use an epinephrine auto-injector, as the case may be, upon authorization of their parent or guardian and prescribing licensed health care professional in writing. Students may self-administer prescription medications with written authorization of the student's parent or legal guardian and physician upon a showing of competency in accordance with law. These authorizations will be on file in the health office and will be renewed annually for continuation by the school nurse. Pursuant to state law, the school district and its employees are to incur no liability, except for gross negligence, as a result of an injury arising from self-administration of medication or use of an epinephrine auto-injector by the student. The parent or legal guardian of the student shall sign a statement acknowledging that the school district is to incur no liability, except for gross

negligence, as a result of self-administration of medication or use of an epinephrine auto-injector by the student as established by Iowa Code Section 280.16. The school district and its employees acting reasonably and in good faith shall incur no liability for any improper use of medication or for supervising, monitoring, or interfering with a student's self-administration of medication.

Cedar Falls Schools Health staff will follow the Iowa Nurse Practice Act standards. FDA approved non-medication treatments will ONLY be administered at school with written orders from a physician as defined in the State of Iowa.

Medication shall be stored in a secured area unless alternate provision is documented. The parent or legal guardian is responsible for providing safe delivery of medication and equipment to and from school and to pick up remaining medication and equipment at the end of the school year or whenever it is no longer needed at school. Emergency protocols for medication-related reactions and uncommon medication administration situations shall be posted in the area where medications are administered. Medication information shall be confidential information not subject to disclosure except as provided by law.

The superintendent or designee shall be responsible, in conjunction with the school nurse, for developing rules and regulations governing the administration of medication, prescription and non-prescription, to students. Annually, each student shall be provided with the requirements for administration of medication at school. The parent/guardian must notify school officials immediately if any changes occur in the administration of medication during the school year.
