

PARTICIPANTS NEEDED

For a study on how color can assist finding words on a computer screen

Graduate student researchers in the UNI Speech Language Pathology Program designed a variety of computer screens using different color contrasts to see which are more beneficial through children's interactions during some simple activities and listening to stories.

WHO DO WE NEED

- Participants who are between 3 years and 6 years old
- Speak English as your first language
- Ability to see all colors

If interested, please contact:

vosseab@uni.edu

Volunteers are asked to attend either June 15, June 22, September 7 or September 21 at the University of Northern Iowa (UNI). Activities will begin at 9am and run until 5pm. Childcare providers will be provided for those parents/ legal guardians who do not care to stay. Will take approx. 2 hours

What will we be doing?

Your child will look at different layouts of pictures on varying background colors and asked their preference. They will also be asked to answer questions, point to pictures, or converse with the researchers based off of a short book or activity. Additional activities will be set up for entertainment purposes.
